

**APPENDIX U**  
**DATABASE 17 REPORTS**

## **APPENDIX U**

### **DATABASE 17 REPORTS**

The Texas Water Development Board (TWDB) requires the Regional Water Plans to include summary tables based on information from the TWDB online planning database (DB17). These tables are included in this appendix and reflect the most current information in the database at the time of the printing of this report. Subsequent adjustments may be made to the database and an update to these tables may be made through an errata to this report. There may be slight numerical differences between the TWDB online planning database and this printed regional water plan due to rounding associated with the regional water plan preparation and online data entry. In any and all instances where numbers in the regional water plan and the online planning database do not match, the data in the online planning database (DB17) shall take precedence over the associated number in the regional water plan for the purpose of development of the State Water Plan and for the purposes of TWDB financing through the State Water Implementation Fund for Texas (SWIFT) fund.

The DB17 reports included in this IPP are:

- Water User Group Population
- Water User Group Demand
- Source Availability
- Water User Group Existing Supplies
- Source Balance
- Water User Group Category Summary
- Water User Group Needs and Surpluses

**Water User Group Population Report**

\*WUG supplies and projected demands are entered for each of a WUG’s region-county-basin divisions. The needs shown in the WUG Category Summary report are calculated by first deducting the WUG split’s projected demand from its total existing water supply volume. If the WUG split has a greater existing supply volume than projected demand in any given decade, this amount is considered a surplus volume. Before aggregating the difference between supplies and demands to the WUG category level, calculated surpluses are updated to zero so that only the WUGs with needs in the decade are included with the Needs totals.
