

**APPENDIX R**  
**INFRASTRUCTURE FINANCING**

## **APPENDIX R**

### **INFRASTRUCTURE FINANCING**

This appendix contains information related to Chapter 9, Infrastructure Funding Recommendations. An Infrastructure Financing Survey, developed by the TWDB, requested information from water suppliers regarding the amount of desired funding from TWDB financial assistance categories. A cover letter was provided with each survey to explain the intent of the survey. The capital cost of each water management strategy project was provided based information entered by consultants in TWDB's online regional planning database (DB17). Recipients were asked to provide updated contact information, an amount of funding requested for each TWDB category, the first year that the funding would be needed for each category, and the percent state participation in excess capacity of the project that may be required.

This appendix includes information related to infrastructure financing. Specific items included are:

- Cover letter mailed with surveys
- Example of infrastructure financing survey sent to water suppliers (first 2 pages only)
- Summary of survey responses to questionnaires

# REGION C WATER PLANNING GROUP

Senate Bill One Fourth Round of Regional Water Planning - Texas Water Development Board

## Board Members

Jody Puckett, Chair

July 20, 2015

Subject: Financing of Water Management Strategies in the Regional Water Plan

Dear Water Provider:

As you may know, the 2016 *Initially Prepared Region C Water Plan* (IPP) is available for public review and comment. You were contacted earlier this year regarding the future water supply plans for your entity, and those future plans have been included in the IPP. A copy of the IPP can be found at [www.regioncwater.org](http://www.regioncwater.org) and clicking on the link at the top of the page. Information specific to your entity can be found in either Chapter 5C (Wholesale Water Providers) or Chapter 5D (Water User Groups by County).

As required by TWDB, at this time we are soliciting input on the manner in which you will be financing the projects listed in the IPP for your entity, and in particular whether you intend to seek TWDB funding for these projects. This information will assist the Texas Water Development Board in financially preparing to meet the State's water needs through their SWIFT fund (State Water Infrastructure Implementation Fund for Texas) and other funds.

Attached is a brief questionnaire developed by TWDB using information from the Region C Initially Prepared Plan. The survey includes all the projects for which you are listed as a sponsor and simply asks how much, if any, of the cost you anticipate needing from TWDB funding programs and when (what year) the funds would be needed. **Please respond to the attached questions and return by August 10, 2015 using the enclosed envelope.** If you do not intend to use TWDB funding for any of your projects, please still do return the survey indicating this information. Please note a few items:

- The projects are in alphabetical order rather than the order in which you would construct them.
- The projects listed as "Conservation, Water Loss Control" represent our estimation of replacement cost for distribution pipelines that are currently a source of excessive water losses. (This does not represent your entire pipe replacement program).
- Many project titles contain a "Q-##" that corresponds to the cost estimates shown in Appendix Q of the Region C Initially Prepared Plan. Please refer to that appendix if you would like further details on the cost estimate.

If you have any questions or want additional information, please call Dario Sanchez of CP&Y at (214)589-6940 or Amy Kaarlela of Freese & Nichols at (817)735-7438. Thank you for taking time to respond.

Sincerely,

Jo M. (Jody) Puckett  
Chair, Region C Water Planning Group

# Infrastructure Financing Survey Report

Entity Name: FORT WORTH  
 Primary Planning Region: C

## Contact Information:

Name: \_\_\_\_\_  
 Phone Number: \_\_\_\_\_  
 Email: \_\_\_\_\_  
 Comments: \_\_\_\_\_

As part of the state water planning process, regional water planning groups recommend water supply projects for each of their respective regions. The Texas Water Development Board (TWDB) has several funding programs for water projects that support the planning, design, and construction of water supply projects with several financing options including low-interest loans and deferral of principal and interest. Texas Water Code (TAC 16.053 (q)) requires the regional water planning groups to examine the financing needed to implement the water management strategies and projects recommended in their regional plan.

**This Infrastructure Financing Survey is a tool to gather information regarding how you, as a project sponsor, anticipate financing the water supply projects recommended to meet your needs in the 2016 regional water plan, including whether you, as a sponsor, intend to use financial assistance programs offered by the State of Texas and administered by the TWDB.**

More information on these financial assistance programs can be found at the TWDB website at: <http://www.twdb.texas.gov/financial/index.asp>

Your cooperation and responses to these questions are crucial to assisting the state in providing ongoing funding opportunities to ensure that our communities and our citizens have adequate water supplies. Note that a response to this survey is required for any entity seeking SWIFT funding for state water plan projects.

Please enter only the share of total project costs that you wish to receive through a TWDB program in the "Share of Costs" fields and do not enter a specific portion of a project cost more than once.

## Projects you are designated as sponsoring in the Regional Water Plan

For each of the project(s) listed below **for which you are designated as sponsor**, please enter only the funding amounts you anticipate requesting from TWDB categories in the 'Amount' field; enter the earliest 'Year Needed' date that you anticipate requiring these amounts; and, enter in the 'State Ownership' field the percent share of the overall project capacity that you anticipate the state taking initial ownership of. Note that the total amount entered into the separate funding categories may not exceed the **Project Total Capital Cost**. **Only enter the amount of funding that you expect to request from state funding programs.**

### Data descriptions:

**1) Planning, Design, Permitting, and Acquisition Funding:** Enter portion of total costs into the 'Planning and Acquisition' category for which you anticipate applying for a low interest loan from TWDB for development efforts leading up to construction. This option includes providing funding for all pre-construction stages of the project.

**2) Construction Funding:** Enter portion of total costs into the 'Construction' category for which you anticipate applying for state funding to construct your project using a low interest loan from TWDB.

**3) Percent State Participation in Excess Capacity of the Project:** Enter the percent share of the total project capacity that will not be needed within the first 10 years of the project life. For some larger projects that qualify, the state may acquire a temporary ownership interest in some percentage portion of the project which allows entities to optimally size a regional project with excess capacity that won't be needed until the future. The entity buys back the state's portion of the facility over time. Principal and interest are deferred on the state-owned portion of project.
