### **5F Texas Water Development Board Required Tables**

The Texas Water Development Board requires summary tables showing specific information on all water management strategies. Those tables can be found in Appendix U of this report, with the exception of the Population and Demand Reports which are contained in Appendix F and G, respectively. The tables are based on information from the Texas Water Development Board online planning database (DB17) and reflect the most current information in the database at the time of the printing of this report. Due to limitations associated with DB17, Region C desires the opportunity to review the DB17 data and make subsequent adjustments in cases where there is a significant difference between DB17 and this paper plan, should the need arise in the future. These adjustments should be allowed without TWDB requiring an errata or amendment to the plan. There may be slight numerical differences between DB17 and this printed regional water plan due to rounding associated with the regional water plan preparation and online data entry. In any instances where numbers in the regional water plan and the online planning database differ by an inconsequential amount, the data in the online planning database (DB17) shall take precedence over the associated number in the regional water plan for the purpose of development of the State Water Plan and for the purposes of TWDB financing through the State Water Implementation Fund for Texas (SWIFT) fund.
