Jody Puckett
Chair Region C Water Planning Committee
1500 Marilla St. 4AN
Dallas City Hall
Dallas, Texas 75201

Dear Jody:

After serving on the Region C Planning Committee for several years as Director of the Fort Worth Water Department, I would like to resign my position and recommend Carman, the new Water Director in Fort Worth as my replacement. Andy Cronberg could continue as the alternate from Fort Worth Water. My retirement from the City of Fort Worth in September 2014 requires that I be replaced as a Municipal representative.

I have enjoyed my service on this important committee and the insight into long range water supply planning for our growing metroplex and the entire region.

Sincerely,

A handwritten signature in black ink that reads "S. Frank Crumb".

Frank Crumb

OBJECTIVE

Seeking a position that can to serve as my career capstone with a top 10 utility agency, with sincere desire to bring decades of experience to a challenging executive management role while helping to build the next generation of industry leadership

PROFESSIONAL EXPERIENCE

CITY OF FORT WORTH

WATER DIRECTOR, 2015 – Present

Direct the activities of the Fort Worth Water Department, providing daily water, sewer and reuse services to an estimated 780,000 retail customers and 330,000 wholesale customers within 30 communities in the greater Fort Worth area. Manage departmental budget exceeding \$400 Million and 10 year capital improvement plan of \$1.5 Billion. Responsible for Council relations, stakeholder engagement in both retail service area and wholesale communities. Lead staff of 970 dedicated and passionate department employees in the day-to-day operations of the utility including: Operation of 5 water treatment plants, 1 regional wastewater plant, 3400 miles of sewer pipe, 3000 miles of water pipe, elevated storage facilities, pump and lift stations, accredited laboratory, regulatory compliance, development plan review and annexation implementation. Provide customer service call center and utility billing service for 280,000 water and sewer accounts, and for the Stormwater and Solid Waste services provided by Fort Worth

- Drive utility towards vision, mission statement and implementation of Effective Utility Management Principles based strategic plan
- Develop business case, design and implementation of Advanced Metering Infrastructure (AMI)
- Design and implementation of asset management and work management processes
- Develop strategy to improve bond rating of the Utility
- Implement water main condition assessment methodologies to bring asset condition understanding in the water distribution system to the level achieved in the sewer collection system
- Plan and implement drought management plans and conservation programs a
- Implement recommendations of the departmental safety audit
- Develop wholesale and retail rate strategies and make recommendations to Council annually while engaging stakeholder support
- Review state legislative proposals and provide impact assessments for ratepayers to policy makers

CITY OF RALEIGH

PUBLIC UTILITIES DIRECTOR, 2010 – 2015

Direct the activities of the City of Raleigh Public Utilities Department, providing water, sewer and reuse water services to an estimated 525,000 people in Eastern Wake County. Manage the annual departmental budget exceeding \$200 Million and 10 year capital improvement plan exceeding \$1 Billion. Responsible for Council relations and stakeholder engagement in the service area, including the merger partner communities of Wake Forest, Rolesville, Knightdale, Wendell, Zebulon and Garner. Lead staff of 621 dedicated and passionate utility professionals in the day-to-day operations of the utility including: Operation of 2 water treatment plants, 1 regional wastewater plant, 2300 miles of sewer pipe, 2400 miles of water pipe, elevated storage facilities, pump and lift stations, full service laboratories, regulatory compliance, development plan review and annexation implementation. Provide customer service call center and utility billing service for 186,000 water and sewer accounts. Utility Billing also provides billing service for the Stormwater and Solid Waste services provided by Raleigh and in many instances the services provided by the merger partner municipalities.

- Developed and implementing a strategic plan utilizing the Effective Utility Management Principles
- Initiated strategic communication plan to support strategic plan and mitigate community impacts of rate increases and impacts of main replacement acceleration
- Led effort to restructure ratemaking and fee setting methodologies
- Facilitated Water Utility Transition Advisory Taskforce helping them to consensus on Guiding Principles for management of the utility, ultimately leading to Council acceptance and integration into our strategic plan
- Restructured management team to break up longstanding management silos within the utility
- Utility has won multiple performance and management excellence awards
- Utility has won public support for the rate increases needed to support conservation initiatives
- Initiated and implementing Strategic Asset Management plan
- Develop retail rate strategies and make recommendations to Council annually while engaging stakeholder support
