Data from WUG is more detailed than TWDB data, particularly in this case where city is near buildout already (within 15 years of buildout) and city based their estimate on current zoning, platting, developer plans, etc.

Historical growth rates according to COG between 2011 and 2017 average 7%. 7% was used for 2020 and 2030 estimates. Rate was decreased to 6% in 2030, and 3% for 2040-2070 (assuming growth will slow as City reaches build-out). This updated population also reflects the removal of other WUGS (N Collin SUD, Westminister WSC, and CO).

Growth in early decades is due to NCTCOG 2017 estimate of 11,540 for all of Royse City. TWDB estimate is lower than this in 2020. A portion of BHP WSC was subtracted out because of boundary differences in the CCMP. This is reflected in the revised revision numbers.
