

## Adjustments to Previous County Memos

4/21/05

Some of the draft county memos have been adjusted since being posted on the Region C web site. The adjustments were made to more accurately reflect the current sources of supplies used by water user groups and the proposed future water strategies for the water user groups. We made adjustments as we learned new information. The summary of changes to the text of the affected memos is described below. The summary table in each memo was also updated to reflect the adjustments made in the text.

### Collin County

- Anna. The proposed strategy of overdrafting groundwater in 2010 was updated to specify that the Trinity and Woodbine aquifers would be overdrafted in 2010. The proposed strategy of getting water from NTMWD was reworded to better describe that Anna plans to participate in the NTMWD/GTUA pipeline project in which the City would be supplied water by GTUA (from NTMWD).
- Celina. More detail was added to the proposed strategy describing that Celina would purchase water from GTUA through the Grayson County surface water project.
- Frisco. The proposed strategy of drilling supplemental wells was added.
- Hickory Creek SUD. The proposed strategy of implementing water conservation was added.
- Melissa. The proposed strategy of purchasing additional water from NTMWD was removed because it was duplicated by the City's plan to participate in the NTMWD/GTUA pipeline project.
- Weston. The proposed strategy of purchasing additional water from NTMWD was removed because it was duplicated by the City's plan to participate in the NTMWD/GTUA pipeline project.

### Denton County

- Pilot Point. The current supply is the Trinity aquifer. The proposed strategy is to purchase UTRWD water. UTRWD does not currently provide water to Pilot Point.

### Freestone County

- Flo Community WSC. The proposed strategy of water conservation was added.
- Teague. The proposed strategy of drilling supplemental wells in the Carrizo-Wilcox aquifer was added.
- Wortham. The proposed strategies of constructing a water treatment plant and purchasing raw water from Tarrant Regional Water District were added.
- Steam Electric Power. The proposed strategy of renewing the contract with Tarrant Regional Water District was removed.

### Grayson County

- Gunter. The proposed water management strategy of purchasing water from Sherman was added.

- Howe. The proposed strategy to participate in the NTMWD/GTUA pipeline project was reworded to reflect the manner in which the water would be purchased. The water will be purchased from GTUA (from NTMWD).
- Pottsboro. The proposed strategy of purchasing water from Denison was corrected to purchasing additional water treatment capacity from Denison.
- Van Alstyne. The proposed strategy to participate in the NTMWD/GTUA pipeline project was reworded to reflect the manner in which the water would be purchased. The water will be purchased from GTUA (from NTMWD).

#### Jack County

- Bryson. The proposed strategies of drilling new wells in other aquifer and drilling supplemental wells in other aquifer were added.
- Jacksboro. The current supply was reworded to better describe the current situation. Jacksboro's current source of water supply is the Lost Creek/Lake Jacksboro System and the City has a contract with TRWD but is not currently using that source. The proposed groundwater strategies were adjusted to include drilling new wells and supplemental wells in other aquifer.

#### Navarro County

- Brandon-Irene WSC. This entity does not have a shortage. The proposed strategy of purchasing additional water from Aquilla was removed. The proposed water conservation remains in the memo.
- Frost. The proposed strategies of implementing water conservation measures and purchasing water from Corsicana were added.
- Kerens. The proposed water management strategies of implementing conservation measures and purchasing additional supply from Corsicana were added.
- Rice WSC. The proposed strategy of purchasing additional water from Ennis has been removed. Ennis does not plan to supply additional water beyond the currently contracted amount.

#### Parker County

- County-Other. The proposed strategy of purchasing additional supply from mineral Wells (Region G) was added.

#### Rockwall County

- No adjustments were made to the text. However, the summary table was corrected to read that the proposed strategies for High Point WSC were to purchase water from the City of Terrell and the City of Forney (both obtain supplies from NTMWD).

#### Tarrant County

- Grand Prairie. The text was reworded to better explain the current supplies. The current supplies were not changed.

#### Wise County

- County-Other. The proposed strategy to decrease groundwater use over time was removed.
- The summary table was updated to reflect the text of the memo.
